

Are you ready to hunt for the next big idea?

International Winter School Lucerne™ 2013

February 12th to February 16th 2013

DESIGN THINKING

The University of Applied Sciences and Arts Lucerne invites you to its fourth edition of the International Winter School Lucerne. In February 2013, the leading topic is Design Thinking. The Design Thinking process draws on methods from engineering and design, and combines them with ideas from the arts, tools from the social sciences, and insights from the business world. The process provides a glue that brings teammates from vastly different fields together around a common goal: make the lives of the people they're designing for better.

In an exclusive project in collaboration with the Stanford University, you will be involved in the Design Thinking Process provided by Professor Larry J. Leifer, Director of the Center for Design Research at Stanford University.

Please note: The number of participants is limited. Participants must be nominated until November 10th 2012.

International Winter School Lucerne™ 2013

February 12th to February 16th 2013

DESIGN THINKING

The International Winter School Lucerne is run in one session during the Winter break:

- February 12th to February 16th 2013
- All classes are held in English at the Lucerne University of Applied Sciences and Arts at the campus of the School of Engineering and Architecture
- Only 2nd and 3rd year Students are able to attend the International Winter School Lucerne
- Applications have to be send directly to the coordinator of the international office of your home institution - direct applications to the Lucerne University of Applied Sciences and Arts will not be accepted
- A formal application is required in order to participate - please contact therefore the international office of your university
- External Students are provided with housing at our student's places and free lunch during the class sessions
- The successful participation in all class sessions is equivalent to 3 ECTS
- Participants from abroad are expected to arrive at Lucerne on Monday, February 11th 2013
- The programme will consist of 5 class sessions, dealing with topics in Design Thinking provided by Professor Larry J. Leifer, Director of the Center for Design Research at Stanford University.
- Moreover, company visits and a social event is scheduled, bringing people together and broaden horizons. It is going to be even more interesting.

Please note:

The number of participants is limited.
